### Service Temperature:

Excellent resistance to continuous service temperatures up to 260°C and, for limited periods, even to higher temperatures; the low temperature resistance of the product allows satisfactory performance at as low -200°C.

### Chemical resistance:

PTFE possesses a high inertness towards nearly all known chemicals. It is only attacked by elemental alkalinemets, chlorine trifluoride and elemental fluorine at high temperature and pressures.

### Solvents resistance:

PTFE is insoluble in all solvents up to temperatures as high as 300°C (572°F). Certain highly fluorinated oils only swell and dissolve PTFE at temperature close to the crystalline melting point.

### FDA Approved:
